

# DualZorb "How To" Guide

## Shop Spills

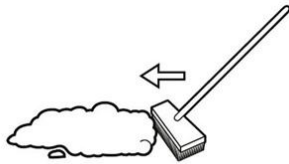

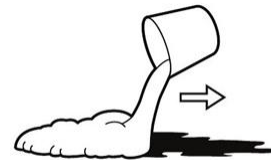

For maximum absorption capabilities, LBI Renewable recommends hydrating DualZorb with equal parts of tap water.

**Step 1:** Mix DualZorb by volume with equal parts of water

**Step 2:** Give product 5 minutes to expand approximately 3x in volume

**Step 3:** Cover the spill completely

**Step 4:** Sweep up and dispose per local, state or federal regulations

## Emergency Spills

- **DRY** DualZorb is recommended for emergency spills.
- Use dry DualZorb to create a berm around the spill.
- After the spill is contained, cover the spill completely.
- Clean up and dispose per local, state or federal regulations.
- DualZorb can be hydrated after the emergency spill has been contained.
